

A simple way to measure your ring size.

Print out this page at 100% and check that the measurements are 170 x 50mm.

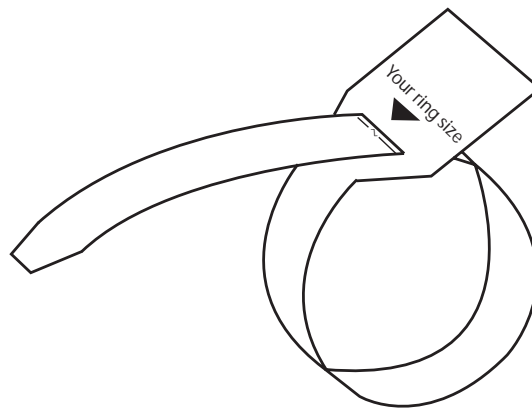

Cut out the Ring sizer belt from the grey background and make a small slit where shown.

Loop round the end and push through the slit to make a belt

Pop it on your finger and adjust to fit comfortably, checking that it can be removed easily over the knuckle.

Read the letter on the scale for your ring size.

Please note, this is a reasonably accurate guide but we will be happy to adjust your ring, if you've chosen an incorrect size, free of charge.
